Echo findings are not consistent with left ventricular outflow obstruction. There is septal akinesis.</p> <p>Tricuspid Valve → 414 The tricuspid valve is normal. There is no tricuspid stenosis.</p> <p>Aortic Valve → 416 The aortic valve is trileaflet. Hemodynamically significant valvular aortic stenosis cannot be excluded.</p> <p>Pulmonic Valve → 418 The pulmonic valve leaflets are thin and pliable; valve motion is normal. Tetralogy of Fallot is present.</p> <p>Great Vessels → 420 There is aortic root sclerosis/calcification. Entry intimal tear visualized.</p> <p>Pericardium/Pleural ← 422 Due to the poor quality of the echocardiogram, a pericardial effusion cannot be excluded.</p> </div>
